## British Petroleums Spud In Number Thrée Well Wednesday Afternoon

### HIGH WIRE FENCE AND "NO ADMITTANCE" SIGNS GREET VISITORS TO LEASE.

In the midst of a beautiful grove of poplar and willow trees, on the S. W. 1-4 of Legal Subdivision 4, of Section 29, Tp. 45, Range 6, surrounded by a high ten wire fence, with iron gates, securely locked with heavy yale locks, the machinery at the new B. P. well was reported to have been started in motion at one-thirty Wednesday afternoon. This lease is one mile south and one mile east of well No. 2 in which commercial production was secured late last fall. The bringing in of the well last fall by the B. P. company has no doubt been the incentive for so active a drilling campaign as is just getting under way in the Irma-Fabyan-Wainwright field. The machinery at this location is supposed to be the most modern and up-to-date rotary equipment on the continent, it having been supplied by the Oil Well Supply Company of Pittsburgh, Pa., one of the largest and oldest manufacturers of oil well machinery on the continent. No doubt the reports published about this modern equipment are correct, but by the reception given visitors at the well since it has been installed, the public and shareholders as a rule must depend on these reports, rather than see for themselves what a really up to date drilling equipment looks like. The location selected for the new well will no doubt produce oil and we hope in very large quantities, but were it not for the derrick and two smoke stacks rising among the trees, a person passing along the road would think they were passing a small game reserve around which the owner had erected a close wire fence to keep his game inside and to keep stray dogs and poachers out. If the equipment within the enclosure is as up-to-date as the fence that surrounds it we have absolutely no hesitancy in saying that it is the finest in Alberta and the best that money can buy. On each corner of the enclosure 'no trespassing' signs are placed. On the two new iron gates, one on the west and one on the south side of the enclosure are two large signs nearly four feet long and about three feet high, reading as follows: **NO PERSON ALLOWED ON THIS LEASE WITHOUT WRITTEN PERMISSION.**—By Order British Petroleum, Limited.

No intimation is given as to where this written permission could be secured, or as to how it could be used to unlock the yale locks on the gate in case a visitor possessed the written permission to visit the lease. The rig and buildings are all some distance from the fence and are well screened by trees. A visitor might stand for hours before attracting the attention of an attendant who would have authority to admit him. Usually when an enterprising manufacturing company (especially one who has depended on the investing public for the success of their enterprise) secures an up-to-date plant, or some modern equipment, they are anxious to have their shareholders and friends inspect same, not to hide it and keep it under lock and key.

If the Edmonton and Vancouver directors of this company, think that by this method they will be enabled to regain the confidence of their many shareholders, who bought their stock at par and above and who had hopes that when drilling was resumed the stock would increase in value may find the reverse. They should remember that when the public was being asked to buy this stock they were assured that the wells would be open for inspection at all reasonable times although we hardly expect that anyone would expect to be admitted while gas or oil was being produced, or within any part of the plant where there was a danger of meeting with a serious accident. If the machinery being used is in the experimental stage and is not fully protected by patent there may be further excuse for the action of the company, but we hardly think this is the case. True, the personnel of the directorate has had several changes since the company was first organized and we predict further changes insofar as the Edmonton representatives of the board of directors are concerned if the management persists in its present method of secrecy.

## Globe Next Company Likely to Start Operations

Mr. Sam Smith, secretary of the Globe Drilling Company, of Edmonton, was in Wainwright last week and reports that his company has got their drill at the Pigeon Lake well started drilling. As soon as the men had everything going smoothly another gang would be started getting ready to commence operations on their location between the Fabyan and B. P. wells. This is a new company operating under a Dominion charter and controlling some very choice locations in all the promising parts of the Irma-Fabyan-Wainwright fields.

## OTHER PROMINENT OIL MEN INTERESTED

Several prominent oil men and geologists from different sections of the States have been investigating the possibilities of the different parts of the district during the past week. Among those was Mr. George Hoffman, general manager of the Oil Well Supply Co., of Pittsburgh, Pa., who has been spending most of the week in Wainwright. The Times has been unable to get in touch with Mr. Hoffman but the following taken from an interview with the Edmonton Journal on his way here will express his opinion of the prospects in store for this part of Alberta.

"Unless I am badly mistaken, Alberta is going to become one of the greatest oil producing countries of the world. From one end of the United States to the other, and even in the Old Country, oil men are looking to Canada as the scene of the next big oil discovery. We have furnished the British Petroleum with expert drillers and their reports to us on the Wainwright field have been more than favorable.

I have been sent to look over the field by our president, Albert Brown, and he will probably make a survey himself during the summer. Men who are qualified to judge have informed us that in their opinion the Wainwright structure is one of the greatest in the American continent. I know that we have thought enough of the fields' future to go out of our way to establish ourselves there. We have backed the British Petroleum with all the machinery necessary to carry on their work in opening up the field."

Mr. Hoffman is one of the pioneers in the oil drilling business in America and holds the important patents on the latest designs of rotary oil drills.

Developments in the United States petroleum industry, he states, particularly in California, have been such to induce operating companies to look to Canada as a possible field of future supply.

His company is playing an important part in the exploration of India for petroleum, having recently sold to the prosperous Burmah Oil company 14 rotary drills.

## MAPLE LEAF COMPANY READY TO SPUD IN

The crew at the Maple Leaf well on Section 24-45-8-4, have lost no time the past week in getting their equipment in shape to start drilling. Wednesday the boiler had been connected and filled ready to steam up, the engine and hoisting machinery was in place and Mr. Beresford assured us that they would be ready to start the drill on its way down by the end of the week. A good supply of running water has been secured from a spring coming out of the side of the hill above the location. This has been piped to the boilers, camp buildings, slush pit and other handy places around the location. Mr. D. Credille, the head driller, and Mr. Beresford, field manager, both good oil men with many years successful experience in producing fields are very optimistic that the Maple Leaf will have the next big well in the district. The location has been pronounced very favorable by several experienced oil men who have been in the district since operations started on the lease. The Maple Leaf Company are considered fortunate in their location, in the men they have secured to drill their well and their company is considered one of the best bets in the district.

## Western Consolidated Complete Derrick; Are Installing Machinery

Mr. A. Visser, the rig builder from Okotoks, has completed the derrick for the Western Consolidated Company on Section 20-45-6-4, and his men are busy placing the standard machinery in place and getting it ready to commence drilling operations. Some delay may be encountered at this well as the company will have to await the arrival of some large pipe which is not due here till the end of the month. A good water well has been secured and cookhouse and other camp buildings are under way. Mr. J. O. Williams, of Calgary, is superintending operations at this location.

## WAINWRIGHT OIL PRODUCERS SYNDICATE TO HAVE HANDY LOCATION

Mr. Bardley, head driller at the Wainwright Oil Producers location, is lining up the machinery and getting things in shape for operations. This location on L. S. 9 of Section 36-44-5-4 adjoining the town of Wainwright. As most of the men working on this outfit are living in Wainwright the company will not be under the necessity of keeping a cook camp and bunk house on the location. The boiler was inspected this week by the Provincial boiler inspector and within two weeks everything should be in shape to go.

## Battle River Municipal Council Held a Busy Session

Councillors of the Municipal District of Battle River No. 423 met in Council room, all members present.

Minutes of last meeting were read and on motion of Mr. Golding were accepted as read.

Moved by Mr. Smallwood that the motion of Mr. Blakely passed April 10, 1924, allowing Mr. Golding to purchase wire to fence road on S. E. corner of N. E. 1-4 25-46-7 be rescinded. Cd.

Mr. Smallwood reported on his investigations with C. G. Purvis re his giving his services as legal adviser.

Moved by Mr. Blakely that the Council sanction the adoption of Mr. C. G. Purvis as legal adviser with a retainer fee of \$50.00 for the year. Carried.

Mr. Smallwood reported on investigation of work done by G. N. C. Higginson.

Moved by Mr. Golding that this Council accept the report of Mr. Smallwood and Mr. Blakely and as the work done has not been satisfactorily done and done without the consent of the Council, that the account be disallowed. Cd.

Moved by Mr. King that this Council order 1, 10in. culvert 20' for Mr. Burton; 1, 10in. culvert 20' for Mr. Smallwood; 1, 10in. culvert 18' for Mr. Blakely and that Mr. Golding be allowed to purchase 2 culverts through the Secretary, if necessary, at a later date. Purchases to be made from the Western Steel Products Co. Cd.

Moved by Mr. Burton that this Council pay \$500. for assessing the land in the Municipality. Cd.

Moved by Mr. Smallwood that the application of P. J. Hardy be accepted for assessing. Motion lost.

Moved by Mr. Golding that the application of Arthur Terry be accepted for assessing. Motion lost.

Moved by Mr. Smallwood that P. J. Hardy be appointed assessor. Motion lost. For. Smallwood and King. Against, Golding, Burton, Blakely, and Fisher.

Moved by Mr. Burton that Arthur Terry be appointed assessor. Cd. For. Burton, Golding, Blakely Fisher. Against, Smallwood and King.

Moved by Mr. Burton that all taxes be cancelled on S. S. B. lands for years they were Crown land and unoccupied. Cd.

Moved by Mr. Golding that account of \$37.50 for 1.50 acres taken for road purposes be paid to proper authorities. Carried.

Moved by Mr. Smallwood that correspondence of J. J. Gadd be placed on file. Cd.

Moved by Mr. Burton that Secretary be instructed to notify Mr. Meyer that Council do not care to pay more than \$20.00 per acre for 4.35 acres taken for road purposes from 33-46-7 and if he does not care to accept same can take it to arbitration. Cd.

Moved by Mr. Smallwood that Council appeal against assessment of N. E. 20-45-9 on the grounds that it is waste land and of no value. Cd.

Moved by Mr. Fischer that Council accept cheque from Canadian National Railways for \$500.00 providing that C. N. R. have settled claim of L. Stougaard and that Mr. Blakely be appointed to see Mr. Stougaard and receive the information. Cd.

Moved by Mr. Golding that Secretary be instructed to purchase the 1919 and 20 volume of the Provincial Brand Book. Cd.

Moved by Mr. Golding that Secretary notify the Dept. of Public Works that the land taken for road allowance from N. E. 20-45-9 was taken by

the Dept. for the trunk road so compensation should be paid by them. Cd.

Moved by Mr. Fischer that correspondence of S. P. Richmond be tabled. Carried.

Moved by Mr. Fischer that Mr. Golding be allowed \$24.00 to spend on refencing road allowance on N. E. 25-46-7. Cd.

For. Fischer, Burton, Golding, Blakely and King. Against, Smallwood.

Moved by Mr. Blakely that Secretary be authorized to forward \$5.00 to the Dept. of Public Works to pay for copy of plan to forward to Dept. of Interior for reservation of unpatented land affected by Plan 945 M. D. Cd.

Moved by Mr. Blakely that Mr. Smallwood be appointed to investigate road diversions on west side of 7-45-9. Cd.

Moved by Mr. Burton that Secretary write The North Alberta Land Registration District asking for location of land affected under Plan No. 944 M. D. Cd.

Moved by Mr. King that hospital bill of F. A. Nash be disallowed as he is not indigent. Cd.

Moved by Mr. Smallwood that account of Jos. Webb for \$5.00 be tabled. Carried.

Moved by Mr. Golding that the following accounts be passed and paid.

A. A. Fischer—Committee Work \$3.50

R. J. Tate—Salary ..... 375.00

G. A. Tripp—Repairs ..... 3.50

G. A. Tripp—Repairs ..... 16.49

Burroughs Addn. Machs—Inspection ..... 6.17

W. C. Brooks—Labor ..... 2.50

F. C. Weise—Pound fees ..... 19.45

Workmen's Comp.—Levy ..... 50.07

The Wainwright Star—Adv. .... 5.50

Simons & Simmerman—Repairs 1.75

Glenholm S. D.—Interest ..... 5.00

W. A. Burton—Councillor fees 68.70

Western Mun. News—Office Supplies ..... 14.46

J. Robb—Labor ..... 15.00

Simons & Simmerman—Repairs 9.90

A. E. Blakely—Committee work 6.40

Carried.

Moved by Mr. Smallwood that the rate for Silver Lane S. D. be 10 mills. Carried.

Moved by Mr. King that as soon as blue print is available that assessment of J. A. McDonald on N 1-2 31-44-9 be adjusted. Cd.

Moved by Mr. Smallwood that motion of April 1st that no Councillor be allowed to spend more than 75 per cent of current taxes be rescinded. Cd.

Moved by Mr. King that no Councillor be allowed to spend more than 70 per cent of current taxes on public work. Cd.

Moved by Mr. Golding that Mr. Smallwood and Mr. Burton be appointed a committee to lay out road diversion with Mr. Blakely. Cd.

Moved by Mr. Golding that Council meet on July 2nd at 10 o'clock A. M. Carried.

Moved by Mr. Smallwood that sale of land taken for taxes from 1920 and 1921 Tax Sales be held, at 2 p. m. on July 2nd. Terms of sale to be 50 per cent of purchase price cash, balance in two equal annual payments bearing interest at 8 per cent per annum or 5 per cent discount will be allowed off purchase price for all cash at time of sale. Sale subject to a reserve bid. Cd.

Moved by Mr. Golding that sale be held at the Village of Irma and advertised in Edmonton Journal, Irma Times and Wainwright Star for three issues. Cd.

## Committees Prepare for Irma Chautauqua June 24-5-6-7-8

Chautauqua committee met in municipal office

Moved by Mr. J. H. Elliott, seconded by Mr. Soneff that Mr. Masson be appointed chairman. Cd.

Moved by Mr. Hardy, seconded by Mr. Haggison that Mr. Love be secretary. Cd.

Moved by Mr. Jones, seconded by Mr. Soneff that Mr. Whyte be chairman of advertising committee with power to add. Cd.

Moved by Mr. Smallwood, seconded by Mr. Fenton that Mr. Hardy be chairman of grounds committee with power to add. Cd.

Albert—Victor Larson, P. Jones.

Glenholm—Gulbraa, Sjafferson.

Orbinalde—Baker, Mrs. Elliott,

McDowell.

Strawberry Plains—Smallwood,

Reid, Hardy.

Sunny Brae—Fenton, Haggison.

Rossa—Mann.

Alma—Lister, Harper.

Ross Mater—Mrs. McCartney,

and R. G. Williamson,

Roseberry—Mr. Elliott, Tate.

Coal Springs—Guy Jackson.

Railway—Whyte, Soneff.

Will the guarantors who have not secured their season tickets kindly apply to H. W. Love for same.

### A Friendly Note Of Warning

When a man occupying the important and high office of Lieutenant-Governor of a Province feels it incumbent on him to lift his voice in public protest against the selfish attitude of people in Eastern Canada regarding matters of vital concern to the prosperity and development of the Province of Western Canada, it is time for those same Eastern people and interests to awaken to the fact that they are playing a nationally dangerous game.

Lieutenant-Governor Brett, of Alberta, is not a man to speak hastily or without giving due consideration to the effect any statement from a man in his position may have. He is a highly trained professional man, absolutely impartial, strictly non-partisan in a political sense, and intensely loyal to Canadian ideals and institutions. Yet on the occasion of a recent visit to Ontario he was, to use his own words, "goaded to exasperation" over the attitude assumed by Eastern people towards the West and its needs and problems to such an extent that he made known his mind in a newspaper interview in the course of which he asked the very pertinent question: "If a barrier was placed at Fort William, what would happen to all the Eastern industries?"

Answering his own question, Dr. Brett declared they would be ruined. Yet Eastern interests go on blindly, and with a self-sufficiency amounting to smugness, declaring to the world and convincing themselves that they owe nothing to the West; that on the contrary, it is the East that has made and developed the West, and that his section of the Dominion is heavily in debt to them.

When a man in Dr. Brett's position even so much as hints in a published interview at the possible effects of cutting the Dominion in two at the head of the lakes, and follows that up by calling upon the people of the west to realize the absolute importance of "continuing to hammer away until they have a real voice in their own affairs," it is, we repeat, time for the East to give heed to the state of feeling they are themselves engineering in this Western country.

We do not believe there is more than a mere handful of people in Canada who would like to see the Dominion divided into two separate and distinct British commonwealths, east and west. At the same time there are unquestionably thousands who believe that economically Western Canada would be much better off and decidedly more prosperous, if it was relieved from the handicaps imposed upon it through Eastern selfishness and self-interest.

The West demands the completion of the Hudson Bay railway. Every political party in Canada has approved its construction and pledged themselves to it. Yet the financial, transportation and commercial interests of Montreal, Toronto, Quebec and the Maritime Provinces, seaports have been successful in denying this much needed outlet to the West. The West stands badly in need of branch lines of railway without which tens of thousands of settlers are struggling to eke out an existence. These branch lines are likewise essential as feeders to the great transcontinental lines of our National railways, but Eastern interests opposed to Government ownership have thus far succeeded in blocking construction.

The East declares it cannot survive unless its manufacturing industries are bolstered up by high tariff protection imposed on the whole Dominion. The West has learned from bitter experience that the most developed and prosperous under such a handicap. If the East insists upon and must have this artificial stimulus, let them have it, but give to the West, which can stand on its own feet and does not require artificial supports, freedom in regard to its own fiscal policies and needs.

The Western Provinces can only obtain "a real voice in their own affairs" by secession, by out-voting the East in the House of Commons, or by convincing the East as to the justice and necessity of admitting the West to a larger measure of authority in determining questions vitally and primarily affecting the West.

Secession should, and will be, seriously considered only as a last desperate remedy.

The ability to out-vote the Eastern Provinces can only come with enormously increased population, which increase is being delayed because of the handicaps imposed on the West.

The sane, sensible, patriotic solution is for the East to abandon their present attitude of regarding the West as one paid for gas, a child in need of a governess, and frankly admitting the right of Western people to a determining voice in matters absolutely vital to their own welfare and progress.

That unity essential to Canada's all-round development and prosperity as a nation can never be realized unless the East abandons its present selfish and arrogant overlordship. It is the Eastern attitude that provides fuel for the spirit of bitterness which it would be idle to deny does exist in the West. If East and West are to grow together, the one aiding and assisting the other, there must be a radical change of attitude east of the Great Lakes.

#### The Motor Car In Canada

The strides made by the automotive industry during the last decade have been remarkable. The motor car is no longer regarded as a luxury. It has attained its rightful place as a utility. The first auto was sold in Canada in 1869. Today the total registration runs close to 100,000. Official statistics show that 996,329 autos entered Canada during 1922 for touring purposes, representing a traffic value of \$170,000,000. Thus the auto took fourth place as a revenue producer.—From the Saskatoon Star.

When some people are unable to do a thing they boast of it.

## CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups — No Narcotics!

Mother! Fletcher's Castoria has been in use for over 20 years to relieve babies and children of Constipation, Flatulency, Wind, Colic and other ailments, allowing Everlasting arting therefrom, and by regulating the stomach and bowels, aids the assimilation of food, giving natural sleep without opiates. The genuine bears signature

John H. Fletcher.

Minard's Liniment for Headache

#### A University at Sea

Six Weeks' Visit to the British Isles and Continent

In all respects the steamship Metacoma will present a university at sea when she sails from Montreal on June 26 with more than 200 students from various Canadian universities, who are accepting the invitation of the Overseas Educational League to visit Europe this summer.

According to the Itinerary, the party will disembark at Glasgow for a six weeks' visit to the British Isles and the continent. The British Empire Exhibition will be visited, as well as historic scenes of London and districts in Scotland, the Sir Walter Scott country, Stratford-on-Avon, and Oxford, and the fourth and fifth weeks will be entirely taken up by London. The party will go to France during the last week, and will sail from Southampton on the Empress of Scotland on August 16 for Canada.

#### Painful Sprains, Bruises Restored By Nerviline

There is soothing power in Nerviline that has made it famous for over fifty years past. It sinks in deeply, it penetrates quickly, it takes away pain from a sprain and brings grateful relief to bruised and aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago, if Neuritis bothers you now and again, use Nerviline. It is a large 25-cent bottle from your dealer today.

#### Hoatzin Is Valuable Bird

The hoatzin is a bird that swims, breaks rocks with its bill, and resembles a bat.

The University of Pennsylvania expedition, sailing for South America to explore the Amazon Valley, will try to bring back all the hoatzins it can find. It is announced, as their market value in America is \$50,000 a piece.

#### SPRING IMPURITIES DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This Season

Dr. Williams' Pink Pills are an all-around tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities as a result of the winter season. There is no other season when the blood is so much in need of purification and enriching, and every dose of these pills helps to enrich the blood.

In the spring one feels weak and tired, the blood is sluggish, the system is sluggish, and the appetite is often poor.—Dr. Williams' Pink Pills develop the appetite, tone the system, and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and blotches.—Dr. Williams' Pink Pills clear the skin because they go to the root of the trouble in the blood. In the blood, rheumatism, indigestion, neuritis and many other troubles are most persistent because of poor, weak blood, and it is at this time when all nature takes on new life that the blood must seriously needs attention. Some people do themselves with purgatives, but these only further weaken themselves. A purgative merely ripples through the system, emptying the bowels, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood which reaches every organ in the body, bringing strength and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Sold by all medicine dealers or sent by mail for 50 cents to Dr. Williams' Medicine Co., Brockville, Ont.

#### Discover Coal Seam

Excavations on the banks of the Little River for coal, within the limits of the city of Prince Albert, have struck a widening seam of harder quality coal. The engineer at the work, a man of practical mining experience, declares the merchantable coal is within measurable distance in the mine.

#### Makes Food Taste Better

No matter how good your fish or meat may be, whether a roast, a chop, a steak, poultry or game, Clark's Tomato Ketchup improves its taste. "Let the Clark Ketchup help you."

#### Says Horse Will Go

Professor Furlong of the University of California, says that in another century the horse will be extinct on our continent. He is so sure about this that he is now collecting skeleton specimens of horses for the California Museum.

#### Prize For Grain Exhibit

As an added inducement for Canadian farmers to exhibit their products at the Chicago International Livestock Show this year the Winnipeg Grain Exchange has donated \$500, to be added to prizes given by the Federal and Provincial Governments to the Canadian farmer who wins the grand championship in the grain section of the show.

#### Women! Dye Faded

Things New Again

Dye or Tint any Warm, Shabby Garment or Drapery

#### Diamond Dyes

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before. Choose any color at drug store.

#### Paris Doing Away

With Street Sweepers

Modern Machinery Taking Place of Women Workers

The old woman who shivering sweep the narrow streets of Paris have lost their fight against modern machinery. The city has decided their usefulness is ended. Henceforth only one woman in three will be allowed, and before long these jobs will be abolished as their holders die or leave.

These women once were among the picturesque sights of Paris, swinging their long-handled, brushwood brooms, beginning at dawn. But now with few remaining there is more of pity than of romance in the sight. It won't be long until some good old woman will be photographed leaning on her witch-like broom and written about for the newspapers as the last of the sweepers.

#### His Flesh Horribly Burnt

His druggist sold him a cheap Add corn remedy. Instead of giving him good old reliable Putnam's Corn Extractor which has been for fifty years the standard remover of corns and warts, "Putnam's" never fails. It is always a success. Use everywhere. Refuse a substitute.

#### A Magnificent Edifice

Thousands of Curious People Visit New Union Station at Toronto

Hundreds of curious citizens daily take advantage of the opportunity to visit and view the new Union Station at Toronto, described as without a superior on the continent. With curiosity piqued by a two-years' sight of closed doors, with interest raised by the storm of controversy over the "railway situation," the paying citizens came to see the first day. For an hour before the time set for opening on the first day there were signs of a lineup. Two hours after the doors opened, 1,700 people had been admitted, and a total of nearly 1,000 curious people saw the white-marbled edifice on the first day. For after day the crowd has not subsided.

Carved in a marble panel, and stretching round the walls, high up, are the names of cities of Canada. Long lines of windows, seemingly endless, stretch down the vast floor areas. Beauty as well as efficiency is the keynote of the new building, and yet to remain so for some time.

In the main waiting room rows of softly curved and "highly polished benches offer comfort to the expectant public. The oak-paneled restaurant and chamber rivals many a pretentious hotel. Luxury for the traveler that never comes, has not been forgotten in the "white elephant" at Toronto. In a room of spotless white marble he may enjoy either shower or bath. Material man can wait for nothing. Even heavily laid cork floors, has been laid behind the windows, etc., for the employees who must perform use leg power to pursue their daily work.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Williams' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

The name of Rothschild, so famous in finance, shines in German "Red Shield," and is taken from the sign of a shop in the Jewish quarter of Frankfurt, where the foundations of the family fortunes were laid.

With so thorough a preparation at hand as Miller's Worm Powders the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

There are 56,510,000 Christians in the world and twice that many non-Christians.

All women are born equal, but some spoil it by getting married.

Dismiss that cough take **SCOTT'S EMULSION**

#### U.S. Airman Makes

Altitude Record

Fifty Below Zero Encountered at Height of 28,411 Feet

Lieutenant Harold G. Harris, of McCook Field, established a new unofficial altitude record for airplanes carrying a load of 551 pounds when the flight was made with this preparation in comparison with previous successful attempts. Instruments in the plane showed that a height of 28,411 feet had been reached and little change from this is expected on final calibration.

The former record was held by Adjutant Bury and was established on Bourget, France, June 11, 1923, when a height of 27,768 feet was attained. Lieutenant Harris was in the air about an hour and a half. A temperature of 50 degrees below zero was encountered at the peak altitude. Lieutenant Harris said, a compass on the plane filled with alcohol having been frozen to a cake of ice when he landed.

#### Canadian Memorial Finished

Remarkable Monument Has Been Erected at Denain, France

Sir Arthur Currie has received notification of completion of the monument erected at the town of Denain in the Department Du Nord, France, to the memory of the soldiers of Denain, who died during the Great War, and of the Canadians buried in the cemetery there.

The monument is surmounted by a large figure of peace and bears in the front below the figure, the statue of a French pilot. The back shows the entry into Denain of Gen. Currie and the troops of the Canadian corps. Round the base are inscribed all the names of the soldiers from the town of Denain who were killed and the names of the Canadians buried in the cemetery there.

Denain was captured on October 21, 1918.

## ASPIRIN

Beware of Imitations!

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-three years for Colds, Headache, Toothache, Lumbago, Neuritis, Rheumatism, Neuralgia, Pain, Pains. Accept "Bayer Tablets of Aspirin" only. Each unopened package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin is a Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

#### Warfare of the Future

Claims Future Wars Can Be Fought With Invisible Rays

Wars of the future can be fought with invisible rays, which create a zone death, in which everything explosive or inflammable will ignite and even metals will be reduced to a molten mass.

That is the declaration of H. Grindell-Matthews, scientist, who claims to have invented a ray projector already effective rays, which creates a zone death, in which everything explosive or inflammable will ignite and even metals will be reduced to a molten mass.

At the present stage of his experiments, Grindell-Matthews has succeeded in extending a ray until at a distance of 40 feet it ignites cartridges and sunpowder, explodes substances and kills mice and shrews and plants.

Grindell-Matthews claims that at an expense of \$2,000,000 he could create a 50-mile ray barrage about London which would absolutely prevent an attack on the city by aeroplane.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

#### Old Ducal Castles

One of the famous old castles of Germany, that of the Saxe-Coburg ducal family, has been restored inside and out to the design which prevailed in 1826, and the owners believe that they have measurably added to the value and picturesque quality of the building.

CLEANS AND DISINFECTS

MADE IN CANADA

SOME OF ITS USES  
For making soap.  
For washing dishes.  
For cleaning and disinfecting refrigerators.  
For removing ordinary obstructions from drain pipes and sinks.  
REFUSE SUBSTITUTES  
E.W. GILLETT COMPANY LIMITED  
WINNIPEG, TORONTO, QUIT, MONTREAL

#### Carried Out Execution

Mounted Police Officer Returns From a Trip to Far North

Completing his trip of many thousands of miles by dog train, Sgt. Hubert Thorne, of the R.C.M.P., has recently reached Edmonton, bringing with him the official report of the hanging of the two Eskimos at Herschel Island. Sgt. Thorne carried north the confirmation of the death sentence.

Both men were hanged in the old "Tow House" of the American whalers on Herschel Island by Special Constable Gill, who was sent north by way of the Mackenzie last year for the execution. Both met their fate with the stoicism of the Eskimo.

Both men had a long list of killings to account for, and each was feared by the other natives of Coronation Gulf and the country to the east; neither of them will be regretted and for many moons, as the Eskimos discuss the topics of the day in their huts by the light of the blubber oil lamp, the story of the fate of Ah-onak and Tatumana will be produced for the benefit of those who, desiring a wife, proceed to render her a widow preparatory to a new marriage.

In spite of the fact that Sgt. Thorne was held up by mild weather last fall in the Yukon, he lived up to the expectation of the force that the mounties are to be at the right place at the right time, and rushed the last 200 miles of his flying trip over the ice and snow, and arrived his dogs into the station at Herschel Island one day before the date set for the execution to find that the condemned men were to be granted a reprieve until Feb. 1.

#### Grain Shipments Westward

An average of \$5,000 bushels daily of wheat has been moving from Edmonton to Vancouver for shipment from that port. During a recent seven-day period 526 cars of grain, chiefly wheat, were examined and graded by the government inspectors at Edmonton.

#### Business Sense

Salesday (to storekeeper).—Gentleman asks if this undershirt will shrink.  
Storekeeper.—Does it fit him?  
Salesday.—No, it's too large.  
Storekeeper.—Yes, of course it shrinks.

The only gold coin in general use in Egypt and the Sudan is the British sovereign.

A Fresh Powerful Battery at the Right Price

NOTE.—We guarantee these Batteries Eighteen Months, if discharged in 30 days, return Freight Collect and we will replace them. No. 11 battery, 9 Volt, 11 Plate, for use in cars, etc., \$14.75. ## Western Prairie Provinces Have Created Huge Market For Eastern Canada's Industries

In Canada the development of natural resources and the advance of manufacture are closely related. The rapid settlement of the prairie provinces, and the invasion of the pulpwood forests—the two most prominent features of Canadian development during the present century—have been outstanding, but at the same time not the only lines upon which this country has advanced, says the Natural Resources Intelligence Service of the Department of the Interior.

The general development of manufacturing forms, in itself, an impressive record, entirely aside from the growth which has, and is, taking place in the pulp and paper-making industries.

A wealth of figures might be marshalled to illustrate the growth of manufacturing within the past twenty years or so. For instance, the total value of goods manufactured in Canada, as reported in 1920, was more than eight times as great as the census returns show for 1900. Such statistics merely suggest the extent of progress. Owing to the variations in census methods, the rise in prices and so on, they give a rather exaggerated measure of growth. Taking the other extreme—the most conservative test—the number of persons reported as being engaged in manufacturing pursuits doubled in the twenty-year period.

The exact extent of growth, however, is not the only consideration. It is equally important to note that the progress has been well distributed geographically and otherwise. It is true that both Montreal and Toronto—Canada's great industrial centres—reported more capital invested in manufacturing in 1920 than was shown for the whole country in 1900, but the smaller cities have not been eclipsed. Twenty years ago only four cities in the Dominion were credited with a manufacturing output of a value exceeding ten million dollars whereas, in the latest returns, over fifty cities equalled that figure, about thirty doubled and placed on a higher level.

Not only geographically but in the nature of enterprise as well has Canadian manufacturing growth been widely distributed. No one or two classes of industry have entirely outstripped the others. The industries producing textile and metal and chemical goods, as well as those finishing vegetable, animal and wood products, have shown excellent progress. For instance the industries manufacturing vegetable products—such as flour, sugar and oil—have, taken first place in the Dominion of growth value of output, but the "iron and steel" industries led in number of persons employed, while the "wood and paper" group surpassed all others with respect to the net value added to the raw materials by manufacturing processes.

The variety of factors that have fuelled explain the breadth and balance that have marked the growth of manufacture.

First, the settlement of the prairies gave a powerful impetus to countless industries—producing a huge supply of raw materials for flour mills, packing plants and other industries finishing farm products, and at the same time creating a large new market for the machinery, textile, rubber, leather, furniture and other factories of Eastern Canada. The influence of this prairie market has radiated in every direction. The purchasing power of the western sales territory is studied with the keenest eye by the manufacturers of almost anything from plows to pianos.

Secondly, the rise of manufacturing in the Dominion owes much to the wonderful advances made since the opening of the century in the use of electric power. The advances along these lines have enabled Canada to realize upon her unexcelled water-power resources, and hydro-electric power has proved a unique asset. Since 1900 the total waterpower harnessed has increased from about 150,000 to nearly 3,000,000 horsepower, serving a

variety of uses that touch practically the whole field of manufacturing industry. Not only is the investment in electric light and power enterprises in Canada greater than in any other branch of manufacture but, further, every large extension of water development has brought in its train a series of subsidiary industries.

Adding to the opening of the west and the Dominion's happy position with regard to hydroelectric resources, two other factors of primary importance have contributed to the advance in manufacture. One is the influence of American industries in establishing branch factories in the Dominion. The growing value of the Canadian market, the advantage of location for trade with other parts of the British Empire, the availability of raw materials, and so on, have drawn hundreds of industries of American parentage. Such subsidiary concerns, backed by the capital, experience and directing force of strong parent companies, have given the ranks of Canadian manufacturing industry many of its most valuable recruits.

Again, the war with its multiple demands tested the resourcefulness of Canadian initiative as never before, and revealed an unexpected capacity for complex and specialized manufacture. Some of the new industries then created have not been able to survive under peace time trade conditions, but the net result has been a permanent gain of no small importance in the diversifying of Canadian mill and factory output.

### Wheat Board Surplus

May Use Funds For Purpose of Research Work

If a proposal which has originated with Hon. W. R. Motherwell, minister of agriculture, is carried out, the Federal Government will utilize the surplus of more than \$500,000, which was left when the Canada wheat board was disbanded, for purposes of agricultural research in general and for the solution of the most problem in Western Canada in particular.

Mr. Motherwell has supported the demands of the western wheat pools and the Saskatchewan Government for the return of a part of the money on a per capita basis to western producers to be used in financing new wheat pools. There is no chance, however, that the Federal Government will be brought around to this manner of thinking, so that Mr. Motherwell has proposed his alternative proposition. It is stated that there is considerable support for it in the cabinet.

It is thought that by applying this money to research work, achievements might result which would be of inestimable value to the agricultural producers of Canada as a whole. The present policy of retrenchment has resulted in a severe cut in the appropriation for the experimental farms where this sort of work has been carried on, and with more funds available greater progress would be made.

### Control of Natural Resources

Arbitration of the Question Will Likely Be Entertained

The resolution of the Manitoba Legislature in favor of the arbitration of the natural resources question so far as it affects that province seems likely to be entertained by the Federal Government.

Back in 1921, when the Norris Government was in office, such an arrangement was practically concluded but, as a provincial general election was impending, Mr. Norris was not anxious to go ahead with the procedure. The election brought about a change of government and nothing has been accomplished meanwhile in regard to any of the provinces. The hope entertained was that of coming to an amicable adjustment but the dissimilarity of the various cases has operated against a common agreement.

The proposed arbitration would be mainly for the purpose of appraising the amount of available resources and in addition to the residue being handed back, to determine the compensation for what have been disposed of.

Premier King's statement on the subject in the house in 1921 was generally favorable to the arbitration idea.

### Farm Exports to France

A sharp increase in the value of exports to France of Canadian agricultural products is noted in a recent return. In 1923 these products went to France to the value of \$6,125,044, compared with \$4,678,928 in 1922.

### Conforming to Law

"Do you object to my bathing suit?" inquired the beach belle.

"Not personally," replied the village cop, "only professionally."

### Superior, Canadian Grain

Most of the Prize Winning Strains Originated in Canada

The varieties of grain which have been carrying off most of the prizes at the International Seed Grain and Hay Show at Culeen since inception of that organization four years ago have been largely originated in Canada by Canadian plant breeders. In the case of wheat the Canadian-bred Marquis variety has been a constant winner of grand sweepstakes prize. At the last exhibition, held in Chicago in December, 1923, the first 13 prizes, including the grand sweepstakes, were won by Marquis. Out of the 25 prizes awarded in the hard red spring wheat class, 21 went to the Marquis variety, two to Klugebush, which is a selection out of Marquis, and one to Ruby, which is a cross-bred sort produced at the experimental farm at Ottawa.

In the oat class, most of the winning samples were of the Victory and Banner varieties. These varieties, while not of Canadian origin, have been developed considerably by members of the Canadian Seed Growers' Association in Canada. Twenty-eight out of the total of 35 prizes in oats were captured by Canada, 21 of these going to growers in the province of Alberta.

In the two-rowed barley class, the sweepstakes were won by Inverkill, Ottawa 57. This is a very fine two-rowed variety originated by the central farm at Ottawa and which is giving a very good account of itself in the trials being conducted at the various experimental farms throughout Canada.

### Emigration Methods Changed

Rejection at Dominion Ports Is Reduced to Minimum

Changes in Canada's emigration methods in Europe to reduce the rejection of newcomers at Canadian ports to a minimum have been made. R. C. Blay, of the Canadian Immigration department, has returned to London after a tour of all Canadian examining centres on the continent. He states that under the new arrangement, a medical examination of prospective immigrants is made by doctors employed by transportation companies, and by the government of the country from which the emigrants come. The Canadian authorities make a complete physical examination so that everything possible is done to ensure that the newcomer will not be turned back at the port of destination.

It is understood that if further harvesters excursions to Canada are conducted next fall, as is probable, precautions will be taken to ensure only men physically fit and temperamental likely to succeed will be accepted.

### Woman Invades Lumber Business

Fort William Woman Has Carried Out First Contract

Fort William boasts a woman who has entered something new in professions; nothing so prosaic as law, medicine, business or politics.

The woman, which, since the first tree was hewn down, have remained the exclusive field of the lumberman and the timber contractor, are at last invaded by the lumberwoman. A real live red-blooded woman takes out her own contract, superintends the erection of her own camp, employs her husband, puts them to work and supervises the cutting of her pulpwood and when men fall sick drives a team herself.

She is Mrs. Kate Bowerman, who is now at the head of the lakes, after successfully carrying out her winter contract and delivering her quota of pulpwood to the Hammett Paper Company of Port Arthur.

### Wheat For Western Route

Alberta May Ship Large Percentage Through Vancouver Next Year

Seventy-five per cent. of the Alberta wheat crop will be shipped by way of the western route next season, is the prophecy of C. M. Elliott, manager of the Alberta wheat pool.

Nearly one-third of all the wheat moved through Vancouver during the current shipping year had originated in the Alberta wheat pool, said Mr. Elliott. The reason more was not handled was due to the handicaps experienced in the limited elevator capacity.

The next crop year, however, pointed to a greater volume. The main item in favor of the Pacific route was the cheapness, which after all is the main factor in transportation circles.

### Still To Be Found

Johnny—"Dad, teacher said something today about finding the greatest common divisor."

Dad (in disgust).—"Great Scott! Haven't they found that thing yet? Why they were hunting for it when I was a boy!"

Perhaps you may have noticed that rich relatives usually live to a ripe old age.

### Round the World Flight

Stuart MacLaren, one of England's best pilots, hopped off from Southampton recently in a lone attempt to fly around the world. Lieutenant MacLaren flew the first British machine in flight.

### The Dairy Cow

Intelligence Is Needed in Proper Care and Management

No animal responds more readily to careful feeding than does the dairy cow, and no animal makes such good use of the food supplied. With a given amount of fodder she will produce more than six times as much human food than will the fattening steer on similar food, conditionally upon her having the capacity to store the milk. Some cows, it must be remembered, will hardly produce sufficient milk to rear their own calves, no matter how they are fed. Such animals dealt with food in the same manner as the fattening steer, and put it on their frame.

The udder is a highly specialized gland which has the power of abstracting from the blood the substances of which milk is composed; it can come from no other source. At the same time it matters not how much of such substances is present the udder has a maximum power and cannot work beyond it. Feeding inferior cows is a wasteful process; feeding good cows is a paying proposition. Breeding and feeding, therefore, go hand in hand, and each should be studied individually, one giving six gallons of milk requires more food than one giving two gallons.

### Destruction of Gophers

Early Spring Is the Time to Set Out Poison Bait

The earlier in the season the attack is made on the gopher the better will be the results. The gopher comes out hungry in the early spring, and then readily take poisoned food. One ounce of sulphate of strychnine dissolved in a quart of vinegar, to which has been added one quart of hot water, one pound of sugar or a pint of molasses and one teaspoonful of oil of rose, makes an effective poison solution. This solution poured out over a bushel of wheat will prepare enough poison for a fairly large area. The grain should stand in the solution for twenty-four hours, and if any of the solution then remains undisturbed, a handful of shorts may be added to take this up. A tablespoonful of the moistened grain placed well in the entrance of the gopher hole will usually destroy the whole family. Great care must be exercised in all stages of the treatment to prevent the poisoning of domestic animals and native birds. Other systems of destruction the gopher are given in Bulletin No. 31 of the Department of Agriculture, Ottawa.

### Importing British Textiles

Goods Said to Be Superior to Canadian Quality

The assertion is made by the trade correspondent of the Yorkshire Press regarding the flow of British textiles to Canada that "not until the Canadian commodity has reached the same high standard that the British commodity holds is it likely imports will be retarded. Only an almost prohibitive duty can stop the demand for goods of superior quality."

The latest official figures concerning British exports of ready made garments shows a steady and substantial progress for the last three years, South Africa being by far the largest customer of the British factories.

## The Many Problems Presented In Dealing Properly With Immigration To Our Shores

The phenomenal increase in the volume of immigration now reaching our shores presents a subject of immense importance to the thinking people of Canada.

Immigration is generally recognized as one of "our social problems," but not everyone realizes that, by immigration, Canada is building up a new national life. In a normal family, each child may be regarded as a "problem," but when the family is increased also by adoption, an entirely new group of "problems" is introduced into the family circle. The immigrant is an adopted citizen, and brings with him along his "effects" a trunk full of new national responsibilities.

Social workers are, perhaps, a little inclined to view immigration by its failures rather than by its triumphs. The individual of British or Anglo-Saxon stock, who "makes good," is promptly and easily absorbed into the fabric of Canadian life; contributes to the taxes; casts an intelligent vote; and requires no "specialized" treatment. The social workers are handicapped by the immigrant to "make good" is connected with some physical defect, through which he becomes a public charge or an unit in the statistics of correctional or remedial institutions. Unfortunately, there are no statistics of the immigrants who succeed and become "our leading citizens," so that the record of immigration, as found in the reports of social work, is apt to be somewhat pessimistic in its outlook.

It is therefore peculiarly interesting to find in the proceedings of the conference of the Social Service Council of Canada last published suggestion for the welfare of the immigrant which involves the setting up of new, specialized machinery for Canadianization, but which is a more profitable use of our existing system of education.

This suggestion is so simple that, at first sight, it may appear unimportant; merely a recommendation that the Federal Government should make provision for ascertaining, as far as possible, the educational standing of immigrants and should turn over this information to the provincial governments, in order that it may be made available for use by the Departments of Education and Health in each province.

When the final destination happens to be a city or town with a highly organized system of education and public health, the problem of assimilation is likely to be dealt with by those more or less expert with it, but our immigration policy is aimed at peopling the remote districts of the country with the local representation of the system of health and education is often not so competent to deal with the reception of the foreign immigrant. In such conditions much might be done were the provincial authorities informed of the arrival of a group of immigrants who were not likely to fit quickly and naturally into existing local circumstances. Information as to educational standing might reveal the presence, in such a group of a teacher who might be, in a very real sense, the "key man" to open the way to assimilation.

No doubt, there will be opposition to such a proposal. "Immigration is a federal matter," is a statement frequently made and partially true, but

since the British North America Act explicitly defines the scope of provincial immigration, this statement should not preclude co-operation between the federal and provincial governments.

"There is no such information provided in the ships' manifests with regard to immigrants" is an objection which is only to be reckoned as final by those (and they are not few) who appear to think that the manifests now contain "all things necessary to the salvation" of the immigrant, and that there is something excruciating in suggesting that they be changed.

The possession of such information by the provincial governments would not only bring the immigrant to the notice of the departments of health and education, as represented by the public health nurse and teacher, but also within the sphere of the churches and other voluntary social agencies with which, to an increasing extent, the more alert governmental departments are co-operating.

### Alberta Bituminous Sands

Have Proven Value for Road Making and Other Purposes

Much attention is centred at the present time upon the bituminous sands of Northern Alberta. Dr. G. A. Ings, formerly of Calgary, has tested the process of William Greenough, of Calgary, for the extraction of oil from these sands and it is stated that if further experiments are satisfactory an extensive development of these sands will result. It is also understood that Dr. Pritchard and Mr. Wendell Jackson, of New York, who have for many years experimented on other processes for the distillation of these sands expect shortly to be in a position to test out the value of his plan. It has been satisfactorily proven that these sands have definite value for the extraction of oil and by-products and for road building purposes.

### Sticking to His Guns

Doctor: "Undoubtedly you need more exercise when you're occupied with your work."

Patient: "I'm a piano player."

Doctor (recovering quickly).—"Well—er—hereafter stick to a tune."

All popular songs are composed and some are decomposed.

## Information for Farmers

**TENDERS FOR ROADWORK.**

Pursuant to the requirements of the  
Canada Highways Act, sealed tenders  
will be received by the undersigned  
up to 12 o'clock noon, standard time,  
of Wednesday, June 18, for the following:

Project 12 Sec. D.—Sub. Sec. 1.—  
Edmonton-Wainwright Main Highway.  
Reference, East boundary of N. W.  
quarter Sec. 27, Tp. 45, Rge. 9, west  
of the 4th Mer., to the N. E. corner  
of the S. E. quarter of Sec. 25, Tp. 45,  
Rge. 8, west of the 4th Mer. Total 9.2 miles.

Copies of Plans, Specifications and  
Profile may be seen at the Office of  
the Highway Commissioner, Parliament  
Buildings, Edmonton.

The cover of each tender will be  
marked by the Project Number, and  
each bid should be accompanied by an  
accepted cheque or Guaranty Company's  
Bond for the sum of \$600.00  
(Six hundred dollars). The successful  
tender will be required to furnish  
Contract Bond to the amount of 25  
percent (twenty-five per cent) of accepted  
bid.

Tenders will be opened in the presence  
of bidders at the time above  
mentioned. The lowest, or any, tender  
not necessarily accepted.

J. D. Robertson,  
DEPUTY MINISTER OF PUBLIC  
WORKS,

Edmonton, June 2nd, 1924.

**5,000 FACTS ABOUT CANADA**

The public will welcome the new issue  
of "5,000 Facts About Canada" for  
1924—a remarkable cyclopedia of  
the Dominion compiled by Frank  
Feigh, of Toronto, the well-known  
Canadian writer and lecturer. Over  
fifty chapters deal tersely with every  
phase of our national prosperity and  
progress, and is not only a mine of  
valuable information, but a stirring  
story of our development. This issue  
includes much new matter, and contains  
many other improvements. We are  
not surprised that this booklet has  
a constant, empire and world wide  
circulation, or that it is widely used  
by governments, railways, and financial  
and industrial houses. Copies  
may be had at 30 cents each from the  
Canadian Facts Publishing Co., 558  
Huron St., Toronto, or from leading  
newsdealers.

Councillor Jessie Stephen

We Canadians admire and desire  
to hear and see men and women who  
have really achieved big things  
through their own unaided efforts.  
What a record Jessie Stephen has!

At sixteen a domestic servant, standing  
by the aid of the candle, after  
having worked fifteen hours a day,  
she is now a member of the London  
County Council, secretary of the  
Domestic Servants' Union, an organizer  
of parliamentary elections, a member  
of the Poor Law Guardians of London,  
and, finally, a Parliamentary candidate  
in the interests of Labor. An enviable record indeed!

Miss Stephen will speak of conditions  
of the men who now rule  
Britain. She is a brilliant lecturer;  
indeed, it almost seems impossible  
that policemen should have to keep  
the crowds back who desire to hear  
her time and time again in England.

With it all Miss Stephen is a most  
developed sense of humor, too. When  
asked by a newspaper reporter what  
sort of a speech she would make in  
order to appeal to an average  
audience of men, she replied:

"I would be as eloquent as possible."

"And if you were addressing women?"

"I should talk sense," she replied.

In view of the general theory that oil or anything pertaining to its development is one of the world's greatest gambles and adventures, it is the duty of persons of sound business experience and judgment to lend their valuable assistance in an endeavor to eradicate this theory.

We all realize that it is a difficult matter for the average person to distinguish the vast difference between a Company that means to develop oil lands and the one that intends only to develop their stock certificates, but a person of ordinary intelligence should take the average prospectus and advertising matter and other data pertaining to same, and study the matter from a common-sense business standpoint, i.e. the Directorate, the basic construction of the Company, including the general plans of development of the properties, and plan of financing, as that is the most important point, for real development cannot be successfully carried on without adequate funds. The joint stock system of finance is considered the most democratic and equitable means of raising money, especially in Canada, where it is practically impossible to find an individual who is financially able to carry on an important development scheme without outside help, so, therefore, the average company has to appeal to the general public for assistance (usually through the joint stock

plan). After a person has been approached by a Company he should size up the Company's representative, their literature, and ask intelligent questions demanding intelligent and authentic answers. After being thoroughly satisfied that the company has competent and reputable officials, reasonable capitalization and par value stock, sufficient and well located leases and oil field equipment, and efficient and careful management, he is quite safe in placing his money with such a concern and has good prospects of a handsome return on his investment. After purchasing stock he should keep in touch with the company and lend what further assistance he can as by so doing he will become a friend to the company and at the same time protect his own interests. Unfortunately, it appears to be the general rule for the average stock buyer to "just forget." We should bear in mind that small investments in oil have returned many fortunes to the investors. The main point in investing in oil is to find the Right Company, and be assured of a fair chance and proper return on your money, through actual development.

A careful investigation will convince a prospective investor that the Globe Drilling Company meets with all the better requirements of an oil development Company.

(Camrose Canadian)

The tremendous task of dismantling the Duhamel bridge over the Duhamel valley, nine miles west of Camrose, has been completed. The wrecking crew left on Friday. The bridge had been a landmark for about fifteen years.

(Ryley Times)

Monday last saw quite a scene of activity at the Ryley Cemetery. Men and women were there with rakes, hoes and spades, also trees, shrubs and flowers for planting, and the end of

the day found the grounds in much better shape than they have been.

(Vegreville Observer)

Cutting off poplar and willow trees 10 and 14 inches in diameter is the feat being accomplished by J. Roth on Wm. Clements' farm south of town. The brush breaker was made by Genery Marchand, especially for tough stuff, and with a sufficient number of horses attached it goes through the trees like butter.

(Strome Dispatch)

Elvin DeForest and Thomas Pizy, who was caught red handed stealing

grain from the N. Bawlf elevator at Daysland one night last week pleaded guilty before the justice the next day. The former was fined \$40 and costs and the latter \$10 and costs. The magistrate dealt very leniently with them on account of their families.

(Daysland Press)

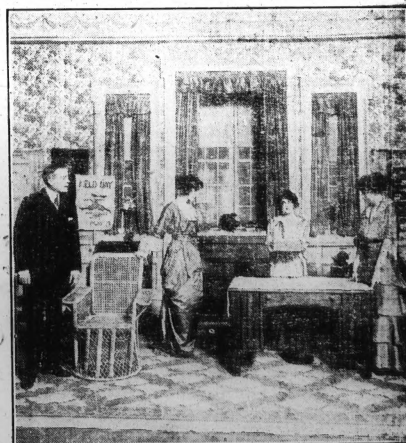

Mr. and Mrs. T. Palfrey and three children came from Wetaskiwin last week, and are occupying the Stokoe house. Mr. Palfrey is a supervisor of the Soldier's Settlement Board. He has been transferred to the Sedgewick district, but will reside in Days-

land, as it is a more convenient centre for his work.

(Wainwright Star)

The little baby of Mr. and Mrs. Alf Chesterman, age three months, met death on Sunday morning through being suffocated by a feather pillow upon which it was lying in its crib.

It appears that about nine o'clock in the morning Mrs. Chesterman had fed the wee mite, and then laid it in the crib to sleep and upon going to the child some time later found that it had turned its face into the pillow and become suffocated.

"DADDY LONG-LEGS"

A charming, wholesome comedy, having a rare appeal to both young and old, is this dramatization, in four acts, of Jean Webster's "Daddy Long-Legs." The play tells the story of Judy, a pretty, clever, little drudge in a bleak New England orphanage. One day a visiting trustee becomes interested in Judy and decides to give her a chance. She does not know the name of her benefactor, but, having once caught a glimpse of his long legs, she decides to call him "Daddy Long-Legs," and writes him letters brimming over with fun and affection. From the founding's home she goes to a fashionable college for girls, and ultimately is married to her benefactor, "Daddy Long-Legs."

"Daddy Long-Legs" enjoyed a two years' run in New York. We are extremely fortunate in procuring "Daddy Long-Legs" for our Chautauqua audiences.

New York Times wrote the following comment: "If you will take your pencil and write down, one below the other, the words delightful, charming, sweet, beautiful and entertaining, and then draw a line and add them up, the answer will be 'Daddy Long-Legs.'"

## A Daughter Of The Ranch

A Story of Romance and Adventure  
in Western Days

BY  
ALEXANDER D. M. LIND

(Illustrated by Special Arrangement  
with the Author)

(Continued)

With renewed hope they resumed their advance. Settling into a steady canter, miles of prairie were passed in silence. After three hours of steady travelling, they came to the stretch of broken prairie where the outlaws had stopped for rest and refreshment. Here they also stopped to water and feed their horses and give them a short rest. They estimated that a two hours ride would bring them to the vicinity of the Souris River.

Their next two hours ride proved uneventful. When, according to their calculations, they were within about two miles of the valley, to escape detection, they decided to make distance to the east of the point towards which the trail of the bandits turned. In this object, they followed a slight depression in the land, evidently a water run, or coulee, which they judged would lead to the valley to the south. In this they were not mistaken, for, as they proceeded, it became deeper with more or less frequent furrows growing along the bottom of it. This offered more or less cover for them as they continued to approach the valley.

By following the windings of the coulee, which deepened the further they advanced, they at last emerged from its mouth as it cut into the high banks of the Souris Valley. Down the sides of the valley they carefully worked their way till they gained the level ground beneath. Here, in a sheltered spot, protected from view by the surrounding trees and underbrush, they held a consultation to formulate their plans of procedure from this point. They concluded that the outlaws must be at least two miles to the west of their present position. They accordingly decided to work their way carefully in that direction, hugging the hillside as closely as possible, and, at the same time, keep under the cover afforded by the underbrush and trees that grew on the bottom flats. Acting according to these plans, they carefully worked their way, keeping, at the same time, a sharp lookout to avoid discovery. They felt certain that the outlaws would have scented them at surprise and attack.

Finally they came to a spot that was well protected from view on all sides. Considering it a safe and well secluded spot they decided to leave their horses, to permit them to carry on further observations without their encumbrance. Leaving them tethered to graze, they took their firearms and cautiously advanced. Keeping well under cover, they made their way slowly along. Finally they came across the trail by which the bandits

had descended the side of the valley. Realizing that they must be now fairly close up to the outlaws, they decided to proceed no farther in that direction. Ronald proposed to his companion that he take a safe position, concealed in the underbrush, and keep a sharp lookout for any movement that might take place. He himself, would climb the hill and take observations with his field glasses from the higher ground with a view to getting the exact location of the camp.

Leaving his rifle with Mr. Fraser, Ronald ventured on alone. After cautiously ascending the hill, he worked his way to a point where he almost had a clear view of the valley through his field glasses. As far as he could see from his position there was no sign of man nor beast within his range of vision. A curve in the valley, about a half a mile to the west of him hid from view a section of it lying beyond. He accordingly, decided to work his way along the brow of the hill to the projecting point of the curve from where, he thought, he could get a broader view along the length of the valley in both directions. As much open ground lay between him and the point he wished to reach, he decided to make a detour along the hillside, under to reach it from the rear by creeping along in the grass in the most exposed places. This meant a tedious under-taking and a dangerous one, but he would take some time to accomplish his purpose, but eventually succeed in his reaching the desired position. In a short time he had examined all the section of the valley visible from that point of view. Still he could see no sign of the camp.

While he commanded a good view of the valley, he could not see the section close beneath his point of observation that he was unable to see owing to a shelving projection of the bank on which he stood. He decided to make him to get a better and closer view of the ground at the base of the hill, he made his way down the steep decline to this shelving bank, which he was able to do successfully under cover of the underbrush and trees that grew in the slight depressions on the hillside.

His efforts were rewarded by discovering the camp, and, at the same time, obtaining a good view of the recess in the embankment in which it was located. It lay not more than four hundred yards beneath and to the west of him. As he examined the ground through his field glasses, he could see a number of horses concealed in the underbrush. He also had a clear view of the open space within this enclosure, where the tent was located. He could distinguish three men, two reclining on the grass, and the third leisurely strolling about. To the right was the tent, but, apparently, he was not in the vicinity of the entrance, evidently regarding and watching her caprice. Then she strolled about and took a circle around to the rear of the tent. Finally, sitting down and reclining on the grass, she remained in this position for some time. Later she arose, and sauntering about the tent, she finally came back from the rear and re-entered it. Cleared and encouraged by the sight of her, he continued to watch her every movement. With his glasses focused on her and her surroundings, he took in the shallow details. The young woman who had fascinated his imagination, and the vision of whom had never left him since he accented her, met him on the trail the previous evening, was within a few hundred yards of him, so far as he saw, yet held captive by a villainous state of outlawry. As he sat and watched her, he chafed under the self-restraint imposed by his conviction that an attempt at rescue in the open would prove futile. In his momentary eagerness he deplored the oversight of leaving his trusty rifle behind, even though his better judgment, disconcerted the notion he entertained of being able to pick the

outlaws off one by one, and thus rescue her from their clutches. But setting aside all such schemes of an advance in the open, which would only expose him to unavoidable dangers, he continued his observations of the movements in the camp. His better judgment counseled him to wait till the darkness of late night would enable them to achieve their purpose by strategy. Under the cover thus afforded their chances against the odds of numbers would be equalized.

As twilight was deepening and the shadows of evening enveloped the valley, he saw the two missing men return to camp. They approached and spoke to the man whom, from his action, he had taken to be the leader. Apparently acting on the information given, he motioned to the other men to approach. Arriving on his evident instruction they sat down and told of their horses on the more open ground. When this was done, he distinguished them in the gloom, making their beds for the night's camping. As this preparation had an important bearing on his own plans for the night, he in the meantime, tried to take in all the details. He noted the location of their beds with reference to the tent and all the arrangements of the leader till he settled down reclining in front of it.

Convinced that no immediate danger threatened the girl, and satisfied that he carried in his head the plan of the encampment, he decided to return to his companion. Under cover of the darkness he carefully worked his way back to the top of the hill, upon gaining which he made rapid progress, and was soon able to join his comrade, who was by now impatiently awaiting his return.

Without waiting to exchange views, they walked back in silence to the place where they left their horses, a few hours hence. On reaching them they sat down to discuss the situation, and to lay their plans for action. Ronald, who had taken the position and position of the camp as he had seen it. He pointed out the position of the tent, the man on guard in front of it, and the horses grazing in the vicinity. Mr. Fraser, who had carried on some independent investigation of his own, discovered that the trail the bandits followed along the foot of the hill, from the point they descended into the valley, could be easily followed in the dark. They then decided that, along about the hour of midnight, they would work their way along the edge of the camping ground, and if all went well, Mr. Fraser would take up a position out of sight, and be prepared to advance if needed. Ronald would quietly approach the tent, and, if possible, rescue the girl without rousing the men. If this were not possible, he was to rush in, shoot her guard, and give the girl a chance to escape in the underbrush before the men could have a chance to get into action. It was a desperate undertaking, but the occasion demanded it. They then outlined their plans, and they implicitly awaited the time for action.

(To be continued)

## City Devoured By Sea

Dunwich Is Now Nothing But a Memory in England.

Dunwich, which was one of the great cities of early England, has been eaten up by the sea. In Saxons times it was the seat of a bishopric. Kings visited there and a royal palace was built. It coined its own money and within its walls were no fewer than 52 churches and religious houses, and as a port it boasted great ships and small ships. The low cliffs of loam and sand on which the famous city stood were hit by bit waves by the waves. The chronicles of Edward I's reign show that 400 houses were swept away in a single year. Between 1525 and 1600 four churches disappeared. In 1677 the sea forced its way into the market place. In 1723 St. Peter's was undermined, and the churchyard went too. Now Dunwich is very little but a memory.

## Very Dry In Worcester

At the Hotel Windsor in Montreal recently a man, evidently of Scottish descent, was approached by Colonel George Ham, famous raconteur, and one of Montreal's leading citizens.

"How is your brother Jack getting along down in Worcester?" asked the colonel. "It must be pretty dry for him down there."

"Dry?" replied Sandy. "Man, he's gone parched. I've just had a letter from him and the postage stamp was stuck on with a pin."

## Composer Also Was Wild

Gushing Hostess.—That last little thing of yours was charming. I loved its wild abandon. Was it your own composition (screwing).—No, madam. I was putting a new string on my violin.

## Writing Bird Book

H. H. Mitchell, provincial taxidermist, is writing a book on bird life in Saskatchewan. He is making a collection of 300 varieties, including the rare whooping crane, the biggest and the humming bird, the smallest.

It's the easiest thing in the world to apologize when you are in the right.

How foolish a man feels when the hairs of a baby being named after him.

No reference is made to the flag in the Bible.

## The Boy Scout Ideal

League of Nations Put Their Seal of Approval on Movement

"BE PREPARED"

A friend who is closely conversant with the methods of the League of Nations sent me lately his congratulations on the fact that the league had passed a resolution, inviting the governments of all the member nations to facilitate, as far as possible, an interchange of visits between the Boy Scouts, the Girl Guides and students of the various countries. He considered this a particularly high tribute to our work and to the ideals, more especially as "students" had only been included in the recommendation as an afterthought.

The resolution was primarily framed on the deserts of the Scout movement. He said that the league realized the value of the training, because in its own work. It is occasionally liable itself to feel the want of Scout upbringing among its own members. Why? Because no country as far as he knew had as yet included in its school curriculum the one quality, which above all others was most needed among mankind today, and which alone the Scout and Guide movement has taken up as the aim of its training, namely, in self-denial, service for others.

Everywhere men are still being trained in a school where self-interest is taught as the motive, where efficiency for success in their career is the first aim, where the higher quality of sublimation of self to the interests of others is omitted. It is in this narrow upbringing that the average man's outlook on the world is, at present formed, hence rivalry, fear and mistrust between man and man, class and class, creed and creed, nation and nation; cut of self is the root of all evil. Should his innate better sense prevail, so that here and there an individual rises in spite of it to be a patriot, his vision in very many cases is still strenuously limited to the individual interests of his own country. Overseas national patriotism is still inclined to bind him to a wider field of world patriotism.

The Scout's training, in service, so that it is where the Scout ideals made their appeal, namely among men who could really appreciate their value, and who saw in the teaching of "service" the satisfaction of a world-wide need. By "service" it means the submission of self to the willing rendering of helpfulness to others without thought of return or reward.

## Tragedies of the Lighthouse

Longships at Land's End Has Most Exposed Position in World  
Longships Lighthouse at Land's End, England, is said to be in the most exposed position in the world. Owing to continuous severe storms, which threatened the lighthouse staff with starvation, it was recently retitled by the British navy as the "Isle of the Longships." The lighthouse has been the scene of many grim tragedies. In the autumn of 1877 one of the keepers was washed off the rock and drowned, the same fate having befallen three at least of his predecessors. Another keeper died in the lighthouse; whilst of two others one committed suicide and another became insane. The Longships was first built of granite about 1782, and was rebuilt in 1872. The spray in rough weather flies one hundred feet over the top.

## SAVED HER FROM AN OPERATION

So Thinks Mrs. Tracey of Ontario, Regarding Lydia E. Pinkham's Vegetable Compound

Knightsbridge, Ontario.—"I took Lydia E. Pinkham's Vegetable Compound because I was suffering from a life for troubles that women often come at that time. I had not been well for a year and was not really able to do my work. A friend who had taken the Vegetable Compound recommended it to me and I think it has saved me from an operation. I highly recommend it to all women who have trouble like mine, and am willing for you to use my testimonial."—Mrs. DANIEL J. TRACY, Knightsbridge, Ontario.

Some female troubles may through neglect reach a stage when an operation is necessary. But the more common ailments, such as irregularities, are not cured by serious displacements, tumors or growths, although the symptoms may appear the same.

When disturbing symptoms first appear take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles.

## THE SOLDIER'S OUTFIT—SHOES

Some one says an army moves on its stomach, and I guess it does, for an empty stomach makes a poor traveller. But it also marches on its shoes.

A poor man may carry a tin of shoe oil one day to see if I could get him a pair of strong shoes. He was getting a job and his boots would not stand the strain.

In the army the boots are most necessary, because of long marches, and wet roads with soaking troubles. One of the worst of all crimes was to make and issue bad boots to our fighting men.

There was an army rule that demanded care of the feet. Every man had to watch that part of his body, and the medical men were always seeing to it that that rule was kept.

Many a soldier had to leave his post because he had a sore foot.

Donald Hankey, who wrote, "A Student in Arms," and who was later killed on the Somme, gives a very tender tribute to the beloved Captain. He tells how careful he was of his men, how thoughtful and wise, how much he cared for them, how he backed them up when tired, and how always played the game and tried to make every man do the same. Among other things he says: "When we started on our march, and our feet were blistered and sore, as often they were at first, you would have thought that they were his own feet from the trouble he took. After a march there was always inspection of feet. If anyone had a sore foot, he would kneel down on the floor and look at it carefully as if he had been a doctor."

It was all because he knew the feet were so important, and you can be sure he was very interested in the shoes the men wore.

Now, at home, boots are also important. Sometimes it is a problem to know just how to get enough of them; but every parent likes to see his girls and boys with feet well shod and comfortable.

If they are bad, they develop corns and sores, and they go to pieces, and then what use are they?

One day I was playing in a football team, and I guess the shoe dealer did not put his best into his job, for my right foot was sore and the sole fell in pieces, and if I had not borrowed one from another chap I would have been out of the game.

We all feel sorry for a poor fellow who has no good shoes. Somehow or other, even if the rest of your garments are shabby, do not let your feet look quite so badly off if the feet are well shod.

There is an interesting little story in Joshua of the nature of the people of Palestine who heard of the great deeds at Jericho and got afraid of Joshua and his army; and they fixed upon a plan to get rid of him. They hid themselves up like far-off strangers and took old sacks and old bound-up Eastern wear, and old garments and many bread, and put old shoes on their feet.

The whole show worked on Joshua's nerves, and he did not know what to do, and when the surrounding people were conquered, these old shoes with the old soles were spied because Joshua, the rest of us, felt sorry for people who looked so worn out.

What a splendid service is rendered by a good shoemaker, a real concerned cobbler; and what a social service he is that makes boots just for pay, and passes out the kind shoes that all right, but are no use, and spoil the feet.

"If I were a cobbler, 'twould be my pride." The best of all cobblers to be is that were a shoemaker, no thicker beside. Should not make old shoes like new."

Now sometimes, shoes are worn out without any good cause, like the copper toes a boy uses up, just by kicking, or the soles that go because of slides or slips along without lifting his feet square off the ground when he walks.

Permits get impatient at having to buy so many boots for children who wear them out so easily, and often can't show any more.

(To be continued)

## Montreal Heard C.N.R. Concert

Among the messages received in Winnipeg following the first Canadian National Railway concert broadcast from C.N.R. was one from Montreal stating that the programme had been heard very clearly there and was much enjoyed.

It is written in records of the Civil War that a code message sent by General Grant to Washington has never been deciphered.

## A Queer Occupation

Vendor Sells Gold Teeth on Streets in Asiatic Villages

The gold tooth craze has struck certain Asiatic villages and towns. A traveller records having seen a gold-tooth vendor sitting on the side of the street with a box of different sized teeth in a box before him. These are slipped on over sound teeth and worn as ornaments. Prospective customers sit the vendors on their own teeth and watch the effect in a small mirror provided by the tooth merchant. When a fit is found, or a tooth that suits a special fancy, bargaining commences and lasts for an indefinite time. If an agreement is reached, the customer pays and goes away with his new possession in his mouth. If no trade is made, the tooth is thrown back into the pile and left for the next customer.

## At 80 Years Of Age Was Troubled With Shortness Of Breath Palpitation Of The Heart And Fainting Spells

Mrs. M. O'Connor, Whitestone, Ont., writes: "I have been troubled, most of my life, with shortness of breath, palpitation of the heart and fainting spells. I was advised by a friend to try Milburn's Heart and Nerve Pills, which I did, and at once found relief, and I have never had a really bad spell since."

I am 80 years of age and always keep them in the house, and when I have any symptoms of an old trouble coming on all I have to do is to take a few doses. With the help of your Pills I expect to see another 20 years. I always recommend them to any one who is suffering from heart trouble."

Now, at home, boots are also important. Sometimes it is a problem to know just how to get enough of them; but every parent likes to see his girls and boys with feet well shod and comfortable.

## C. N. R. Earnings

For the week ending March 11, 1921, the gross earnings of the Canadian National Railways were \$1,736,446, an increase of \$765,551.24, or 47 per cent, over the corresponding period of 1920. From the first of the year to date mentioned, the gross earnings of the system were \$45,699,817, an increase of \$2,226,334.18 over the same period of last year.

## WORLD HAPPENINGS BRIEFLY TOLD

Capital punishment has been abolished in Austria, Holland, Norway, Sweden, Portugal, Italy and Rumania. Announcement is made that His Majesty, with great regret, has approved the abandonment of King Edward's Horse.

Divorces exceeded marriages in Constantinople during the last year according to the Daily Mail correspondent. He gives the official figures at 5,259 against 7,954.

A combined total value of imports and exports of \$357,685,730 is the record of the port of Vancouver for 1923, according to a statement issued by the board of harbor commissioners.

Turkish police closed French and Italian schools in Constantinople. This action was taken owing to the failure of the school authorities to remove from the schools religious emblems.

Between eight and ten millions of dollars have been remitted to Canada through New York, in final adjustment of British Government debts to Canada hanging over from the war.

Police officers are given the right to arrest without a warrant of anyone carrying liquor, by an amendment to the Ontario Temperance Act, adopted by the legislature.

A passenger and mail air service between Victoria and Vancouver may soon materialize, if plans are found feasible. It will be the first service of its kind operated in Canada, it is said.

**A Foe to Asthma.** Give Asthma halt a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellie's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the most breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

## Valuable Map Found

Said to Have Been Made by Christopher Columbus

A map, made by Christopher Columbus and of great value owing to its possible bearing on his discovery of America, has been found under curious circumstances in the National Library by M. De La Roche, head of the printed book section.

M. De La Roche believes the map to be none other than the one which inspired Columbus' epoch-making voyage. It was filed in the library as a Portuguese map of the sixteenth century.

An illustration accompanying the document gives a notably fine view of the port of Genoa.

The map represents the earth as it was then known, in the form of an island enveloped by four oceans and gives in detail the coast lines of Europe and of Africa as far as the Cape of Good Hope.

## Pay For Occupation Armies

An agreement between Foreign Minister Kalliof and the Inter-Allied commission has been reached by which Bulgaria will pay 25,000,000 gold leva for the expenses of the armies of occupation after the armistice.

## "I Suffered Terribly With Sore, Aching Back"

Mrs. Roland Ferguson, 194 Lake St., Peterboro, Ont., writes:

"For over two years I suffered terribly with sore back. I was almost mad with the pain, and had doctored with it until I was discouraged. Then my father, a firm believer in Dr. Chase's Kidney-Liver Pills, advised me to try Dr. Chase's Kidney-Liver Pills. I followed his advice, and am glad to say I was completely relieved of that torturing pain in my back. It is over a year since I used these pills, and I have had no return of the trouble, but always keep them in the house."

**Dr. Chase's Kidney-Liver Pills**  
35 cts. a box of 35 pills, Edmundson, Bates & Co., Ltd., Toronto

## Demand and Supply.

American Farmers Will Soon Produce For Home Market Only

Not until American farmers have adopted the policy of producing only enough wheat for the domestic market will it be able to afford real protection to them. The three drift of economic forces seem destined in time to bring about this condition. In which American wheat farmers will produce for the home market only. Last year the world took only 173,500,000 bushels of our wheat, including flour, compared with 223,800,000 bushels in 1922 and with 256,000,000 in the fiscal year 1923-24. With the other great wheat producing countries able to grow wheat cheaper than the United States, and with the present great world sowings, a substantial reduction of our wheat average is inevitable.—New York Herald.

## Is In Perfect Health Again

So Says Madame Blanchette of  
Dodd's Kidney Pills

Quebec lady suffered from bad kidneys for three years and was restored to good health by using Dodd's Kidney Pills.

St. Raphael, Que. (Special).—From all parts of Canada come the same glad tidings, telling the same story of suffering that suffer no longer, of the weak being made strong and healthy, and of the good work that is being done by Dodd's Kidney Pills. People are now learning the importance of keeping the kidneys in shape, of watching for the least symptom of kidney trouble, and they turn at once to Dodd's Kidney Pills, because they know they have a remedy that they can rely on, a remedy that never fails. Right here in St. Raphael, Madame A. Blanchette, a much respected resident, comes forward with a statement that adds to the long list of grateful letters. She says:

"For three years I suffered with bad kidneys and no other remedy did me any good. After taking six boxes of Dodd's Kidney Pills I am in perfect health again."

## Soviet Airman Will Attempt Polar Flight

Will Set Up Red Flag on North Pole

Not Later Than September

The red flag must be set up at the North Pole not later than September, Rossiak, the Russian airman who contemplates an aerial expedition to the top of the world in June, said. According to Rossiak, some ten persons, including scientists, will participate in the expedition. The air plane to be used, he said, would be of the hydroplane type, specially equipped to carry fuel for a 48-hour flight.

## SPRING WEATHER HARD ON BABY

The Canadian spring weather—one day mild and bright; the next raw and blustery, is extremely hard on the baby. Coughs and colds are sure to follow. The mother cannot take the little one out for the fresh air so much to be desired. He is confined to the house which is often over-heated and badly ventilated. He catches cold; his little stomach and bowels become disordered and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. The Tablets are sold by medicine dealers or by mail at 25c a box from Dr. Williams' Medicine Co., Brockville, Ont.

## Large Sum For Shakespeare Folio

At the auction sale of the portion of the famous Britwell Library in London, Dr. Phillips H. Rosenbach, Philadelphia, paid \$1,850 for a copy of Shakespeare's "Rape of Lucrece," 1632, of which only five copies are in existence.

More than 277,000 already has been realized at the sale. Dr. Rosenbach paid \$23,000 for the most valuable items in the collection.

Estimates place the total population of the world at 1,500,000,000.

## Constipation

Because they contain mercury and mineral salts, many pills are harsh. The easiest and safest laxative is Dr. Hamilton's Pills of Mandrake and Butternut. They clean the stomach, intestines and bowels—drive out waste matter, tone the kidneys, and forever cure constipation.

## Dr. Hamilton's Pills Instant Relief

As a general tonic and system cleanser nothing is so mild and efficient as Dr. Hamilton's Pills of Mandrake and Butternut. At all dealers. 25c per box, five for \$1.00, or The Catarhizine Co., Montreal.

## McKim's Directory Of Canadian Publications

Daily Newspapers Have Decreased As Well As Weekly Newspapers

There are 1,199 newspapers and regularly published periodicals in Canada, against 1,553 a year ago. Daily newspapers have decreased from 121 to 111; semi-weeklies from 24 to 20; and weeklies from 1,022 to 975. On the other hand, a small increase has taken place during the year in the number of monthly and semi-monthly periodicals.

The facts are shown in McKim's Directory of Canadian Publications, under which name the Seventeenth Edition of the Canadian Newspaper Directory has just been issued. It is the only complete directory of the publications of Canada and Newfoundland, giving accurate, physical and circulation details of each publication.

At the back of the book are several lists of publications arranged for convenient use by the advertiser, such as the condensed list arranged by Provinces, the list of daily newspapers, the classified list arranged by cities, the classified list of general and special publications, and a list of publications in languages other than English or French, with statistics as to the populations they reach.

Information on the geography, population and industries of each province is given, as well as detailed facts about each city, town and village where a newspaper or other publication is issued. McKim's Directory thus is a valuable compendium of information commonly required by those whose business demands a general or special knowledge of Canada. A. McKim, Limited, is the publisher. In the preface it modestly states that it is only because of the service it renders to advertisers that it has become and remained the largest Advertising Agency in Canada.

The price of McKim's Directory of Canadian Publications is \$3. Copies may be had from the McKim Office at Montreal, Toronto, Winnipeg, Hamilton, and London, England, 6 Norfolk St., W.C.C.

## Established a Record

Twin Brothers Work Together For Sixty-One Years

Richard and John Webber, twin brothers born near Barnstable, Devon, in 1851, have established a record of coincidences.

When twelve years of age they started work together in Wales as moulers, and have worked side by side at the same occupation ever since. Both were married on the same day and they live next door to one another.

Each has ten children. They have both been Sunday school teachers and choristers for 57 years.

For years Mothers' Graves' Worm Exterminator has ranked as a reliable worm prevention and it always maintains its reputation.

## Pershing May Retire

Famous American General Will Be 64 Years Old on Sept. 13

General Pershing has settled down for the last mile of his remarkable army career.

He has returned to his desk from a six months' trip in Europe, where he revealed the battlefields and completed his story of the world war. On Sept. 13 he will be 64 years old, and will retire from active service automatically, unless congress acts on a pending bill to waive the age limit, so that he may continue to give the army the benefit of his unparalleled military experience.

Saskatchewan Representation  
Saskatchewan will again be represented at Toronto and Chicago livestock exhibitions to be held this year. This was decided at the meeting of the Saskatchewan Livestock Board held in Regina a few days ago.

Most cyclones in North America follow definite tracks which cover Southern Canada and Northern United States.

## A Record-Breaking Play

Great Crowds Force Hold-Over of "Lightnin'" Another Week in Winnipeg

To meet the record-breaking demand for seats, "Lightnin'" will remain at the Walker Theatre, Winnipeg, through Easter week, with the annual matinees on Wednesday and Saturday. Early this week, when it became apparent that thousands would be turned away unless the famous comedy classic could be held over, arrangements were made to extend the engagement to Saturday night, April 26. On the following Monday, April 28, the company will move to Saskatoon, to split the week with engagements of three days each at the Prince Theatre in that city and the Regina Theatre, Regina.

Not since the farrow tour of Sir J. Forbes-Robertson has the Walker Theatre held such large, enthusiastic audiences as have surged in to meet Bill Jones, the directions' scandalous address, the Reno judge and the other vividly discussed characters of "Lightnin'." The thrilling courtroom scene, the hotel astride the California-Nevada state line and the other high lights of the play have captivated Winnipeg audiences as completely as they did Broadway during its historic run at the Gaiety Theatre. Thomas Jefferson, Bessie Bacon, Charles E. Evans and the other artists who are introducing "Lightnin'" to Canada, will be sent to London next summer.

## Stops Coughs, Colds

Sore Throat in a Night

Think of a medicine so healing, so balsamic and antiseptic that every trace of cold and sore throat goes before it.

CATARHOLZON is so certain in catarrh, bronchitis, that every case is relieved promptly. Experiment no longer—success is guaranteed. It you use CATARRHOLZON—a veritable death to catarrhal diseases, because it destroys their cause and neutralizes their effects. Bold and simple to use, quick to act, sure in results. Better get CATARRHOLZON today. Large bottle, sufficient for two months' treatment, price \$1.00; small size 50c. At all druggists. It is a substitute for CATARRHOLZON. By mail from The Catarhizine Co., Montreal.

## Instructions Observed

The managing editor of a city newspaper wheeled his chair around and pressed a button on his desk. The subordinate waited entered. "Here," said the editor, "are a number of directions from outsiders telling us how to run the paper. See that every one is carried out." And the office boy, gathering them in a large waste basket, did so.—American Legion Weekly.

The Oil for the Farmer—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mother who suffers from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Curriculum, a new gas recently made by an electric process in Los Angeles for use in airplanes, is declared to be non-inflammable, non-explosive, cheap and easy to produce.

In Utah persons under sentence of death may, if they so desire, be shot, by a firing squad.

## MRS. ALBERT BLUNT

The Kidneys are the Blood Filters—When They Weaken and Stop Up, the System Becomes Clogged With Uric Acid.

Toronto, Ont.—"I can highly recommend Dr. Pierce's (Auric) (uric acid) Tablets to all those who suffer in any way with their kidneys or bladder. As I have ever taken. My kidneys were congested and inflamed, my back ached something awful, my bladder was weak and I suffered from a scalding and burning sensation. I was almost down and out, thanks to Doctor Pierce's (Auric) (uric acid) Tablets. I do not suffer any more. Those who suffer as I did will find Dr. Pierce's (Auric) (uric acid) Tablets just the medicine they need."—Mrs. Albert Blunt, 6 Brevin Place.

Ask your nearest druggist for Auric, in tablet form, or send 25c to Doctor Pierce's Laboratory in Bridgeburg, Ont. for full package. Write Dr. Pierce, President, 1001 Locust, Buffalo, N. Y., for free medical advice.

Minard's Liniment for Colds  
British Columbia Timber Resources  
Three and a half million dollars, or nearly 20 per cent. of the whole revenue of the province, is the estimated direct gain from the timber resources of British Columbia during the coming fiscal year. Timber licenses are expected to produce \$1,250,000, royalties \$1,600,000, timber sales \$250,000, and timber leases \$100,000.

## Smoke OLD CHUM

The Tobacco of Quality

Sealed Package 15¢  
(which keeps the tobacco in its original condition)

Manufactured by Imperial Tobacco Company of Canada Limited

## Wearing Military Uniforms

Unauthorized Persons Who Wear Military Clothing Will Be Prosecuted

Prosecutions have been instituted by the Department of National Defence against unauthorized persons wearing military uniforms and cloths.

During the past four years there has been an annual loss of the department amounting to tens of thousands of dollars, due to military uniforms and clothing issued to the personnel of the non-permanent active militia being worn by them in lieu of civilian clothing. Although such losses are borne largely by the department, officers commanding units must bear a portion of the cost of the missing articles.

If these losses continue to occur it will be necessary to take some drastic action under the provisions of the criminal code in order to protect the treasury and relieve commanding officers of this undue financial hardship, according to officials of the Department of National Defence.

The unauthorized wearing of parts of uniforms has become widespread, due largely to the quantities of surplus English military clothing being sold by dealers in Canada. A recent warning issued by the department in this matter has brought numerous complaints from all parts of the country. It is pointed out by officials that contrary to the current impression, there has been no extension of the provisions of the criminal code, and the department merely draws attention of the public to laws that have been in existence for a number of years.

## Botanist Makes New Discovery

Coughing Plant in Tropics Has Dislike For Dust

Not satisfied with finding trees with heart beats, plants that trap living things and feed on them and other wonders, a botanist has now discovered a plant that coughs. This is a certain bean that grows in the tropical regions. The coughing plant is a very cranky member of the vegetable kingdom and has a great dislike for dust. As soon as a single grain of it gathers on its leaves, the air chambers that cover the face of the leaves and are the breathing organs of the plant become filled with gas and swell until, with a slight explosion and a sound that resembles a human cough, the gas is expelled and blows away the troublesome dust.

## Minard's Liniment for Colds

British Columbia Timber Resources  
Three and a half million dollars, or nearly 20 per cent. of the whole revenue of the province, is the estimated direct gain from the timber resources of British Columbia during the coming fiscal year. Timber licenses are expected to produce \$1,250,000, royalties \$1,600,000, timber sales \$250,000, and timber leases \$100,000.

A Humble Beginning  
Aspiring Young Man (to Senator).—How did you become such a wonderful orator?  
Senator.—I began by addressing envelopes.

Among English mothers there was formerly a curious belief that, when having a bath, they must not wash the back, as water weakened that part of the body.

Minard's Liniment for Sprains

## War Material Scrapped

Largest Pile of Junk Metal in the World to be Sold at Vancouver

One of the greatest piles of junk metal in the world will be placed on sale in Vancouver to anyone willing to pay from \$500,000 to \$1,000,000. In the earlier years of the Great War, the British and French Governments had constructed in Canada and the United States huge quantities of railway material for Russia. Forty thousand tons of car wheels, trucks, springs and bolts were accumulated in Vancouver—when the Russian revolution broke out. Not a pound was ever loaded on a ship. The material, which cost \$11,000,000, was of a special size for Russian railways, and it is now advertised for sale in London.

### HELP FOR FOOT SUFFERERS IN FOOT COMFORT WEEK

Those who have trouble with their feet and how many do not, are looking forward to Dr. Scholl's National Foot Comfort-Week, June 21st-28th, when they will have the opportunity of obtaining expert advice on foot troubles at McFarland Shoe Store. A Foot Comfort Expert specially trained in the Dr. Scholl method of foot correction, will be in the store to explain the most approved ways of caring for the foot. For years people have been told that they should look after their teeth and eyes but the feet have been a neglected source of human discomfort and misery. Dr. Scholl's National Foot Comfort Week which has become a great country-wide observance, shows that people are beginning to think of their feet. More than 20,000 shoe stores in the United States and Canada are participating in Foot Comfort Week.

### CARD OF THANKS

We wish to thank our many friends for their kind assistance and sympathy during our recent sad bereavement. Also those who furnished the excellent wreaths and sprays.

Mrs. Steele & family.

### CARD OF THANKS

The brothers and sisters of Miss M. E. Milburn wish to thank all neighbors and friends for the kind assistance and deep sympathy shown during our recent sad bereavement.

The Brothers & Sisters.

The Ryley Times has again made its appearance after a lapse of a few months. This time under the management of J. Zantler, formerly of Camrose, where he published the Victoria Farmer. The new paper starts out with a liberal patronage from the business men and is a new little four page paper throughout.

## Main Street

Mrs. J. Merry has returned after spending a few weeks with her son Roy Merry, at Meeting Creek.

Mr. J. Brown of the S. S. B., Edmonton was in Irma Wednesday inspecting some land north west of Irma. Mr. T. Derman is having a new directory prepared for the use of local subscribers to the Irma Phone Exchange.

Dr. and Mrs. D. S. Craig of Kenora left for home last Tuesday after spending a few days with Mr. and Mrs. J. W. Milburn.

Four head of cattle belonging to J. W. Milburn were killed on the railway track east of town last Saturday morning.

Mr. George Mann, of Lundar, Manitoba has been packing a few days with his brother W. Mann, manager of the Royal Bank at Jarro.

Raymond E. Ramsay returned Tuesday night after attending the University week for farm boys, at Edmonton.

Dr. McMachen, dentist, has changed his visits to Irma from Wednesday to Fridays of each week. Please take note of the change.

The members of the Irma Oddfellows Lodge met Tuesday night and held a memorial service by visiting the cemetery and decorating the graves of their departed brothers and sisters.

Mr. P. J. Hardy found a spare tire and rim about three miles west of Irma Tuesday night. If owner will call at Mr. Hardy's office he can secure same.

Mr. A. S. Whalley of the Bank of Montreal, Hughenden has been renewing acquaintances with his friends at Irma during his vacation the past week.

The Annual Sports and Baseball tournament will be held on the Orbindale picnic grounds next Wednesday afternoon. An invitation is extended to one and all to attend these sports which will be free.

Mrs. F. M. Hill was operated on for appendicitis Monday morning in the Royal Alexander Hospital, Edmonton. Mrs. H. W. Love and Grace accompanied Mrs. Hill to Edmonton Saturday morning. Mr. Hill going to Edmonton on Sunday nights train. Mrs. Hill appears to be doing nicely since the operation and expects to be home within a couple of weeks.

### NEW ICE CREAM PARLOR AND TEA ROOM

Mrs. H. W. Anderson has taken over the building formerly known as the Irma Ice Cream Parlor and is busy rejuvenating same and getting ready to open an up-to-date Ice Cream and Tea Room. Light lunches Ice Cream and Soft Drinks will be served at all hours. Mrs. Anderson expects to have the new parlor open for business about the end of next week.

## OBITUARY

With deep regret we record the death, in Edmonton, Saturday, May 31st, 1924, of Mary E. Milburn. Miss Milburn was taken ill April 14th with an attack of pneumonia, while teaching in Lewisville School district and after recovering somewhat was taken to Edmonton to her sister, Mrs. S. G. Lewis, in hopes that she would regain her usual health and strength but "passed on" on the above date.

Mary Elizabeth Milburn was born in Grey County, Ontario, and received her early education in Owen Sound, and later taught. In May, 1909, she and her father, Mr. John Milburn, deceased came to Irma and made their home with J. W. Milburn and here Miss Milburn followed her chosen profession, having taught in Sunny Brae District, Galt Edge, Chauvin, Irma and later in Lewisville School District.

She leaves to mourn her loss, three brothers, J. W. Milburn, Irma; Ross S. Milburn, Pensacola, Florida and C. W. Milburn, Toronto, Ont. and two sisters, Mrs. D. S. Craig of Kenora and Mrs. S. G. Lewis, Edmonton. Her father, Mr. J. Milburn having predeceased her some years ago.

The deceased was interred in Irma cemetery Thursday afternoon, June 5 following an appropriate service in Irma Church by Rev. Geo. Elliott. The church was filled with sorrowing friends many of whom had been pupils of the late Miss Milburn.

### WILLIAM B. STEELE

#### PASSES AWAY

Irma and the surrounding district has been saddened this week by the removal by death of one of the oldest settlers and one who was respected and loved by all who knew him. The late W. B. Steele came here from near Ottawa, Ontario, with J. G. Clark, E. Ripley, G. A. Tripp and R. Bell 18 years ago when he filed on his homestead on the N. W. of Section 36-45-8 ten miles east of Irma. At that time Irma was not thought of and it was several years after when the Grand Trunk Pacific was built and the townsite was laid out.

The late Mr. Steele has been suffering for some time with heart trouble till death relieved his suffering Sunday morning, June 8th. At the time of his death he was 64 years and five months old, and besides a sorrowing wife leaves three daughters and three sons to mourn his loss. Mrs. W. T. Deans of Toronto, (Marjory) Mrs. J. J. Wakefield, of Clarmanor, Mrs. L. Knudson of Irma. The three sons are William, Clark Manor, Keith of California and Clark at home. The funeral was held from the Irma Church Tuesday afternoon when Rev. Geo. Elliott held a very appropriate service. The church was packed with sorrowing neighbors and friends. The following old-timers acted as pallbearers, C. T. Hill, W. T. Leamaster, R. Goulding, H. W. Love, W. H. King and J. H. Elliott. The casket was covered with wreaths and sprays from the family and friends.

DENTON C. CROWL

Who is Denton C. Crowl? He is a journalist of distinction, a man of affairs, a clear, forceful, original thinker, and a lecturer whose platitudes has stood the test of twenty long years, both in Canada and the United States of America. He is on the editorial staff of three of the most influential newspapers in America, and there is scarcely a Province in Canada or a State in the American Union where he has not lectured, and where his syndicated articles for the press are not read. In his Lecture, "A Medley of Facts, Philosophy and Fun," he treats in a most original manner the pressing problems which clamor for solution; with tremendous force and passionate eloquence, he drives home, with startling conviction, the truths his audience should receive.

When you hear Denton Crowl, you will feel, as all audiences feel—here is a man with a message; a bold, logical and fearlessly original thinker, a man who is serving his day and generation in a truly remarkable way.

AT CHAUTAUQUA  
IRMA, JUNE 25-26-27-28

## Municipal Notices

### VILLAGE OF IRMA

Notice is hereby given that if all arrears of taxes imposed previous to 1924 in respect of any parcel of land situated within the Village of Irma, are not paid on or before the first day of July next, such lands will be dealt with under the provisions of The Tax Recovery Act 1922, with a view to obtaining certificate of title in the name of the Village of Irma in respect of such parcel.

Dated at Irma this 9th day of June 1924.

N. M. MATHISON, Sec.-Treas.  
I-T
